I benefit from listening to XM Satellite Radio and its traffic and weather channels because it's a continuous update of the conditions in the Detroit area. It's also an invaluable tool when traveling as I recently tuned into the Chicago station on my way to the city. It notified me of a back-up that I was able to avoid. XM Radio provides variety and quality that are not available elsewhere. I listen to XM whenever I am in the car and recently purchased an XM boombox for at home listening. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we, the subscriber, demand and deserve.
